World Health Organization ranking of health systems in 2000

From Wikipedia, the free encyclopedia

The **World Health Organization (WHO)** ranked the **health systems** of its 191 member states in its [World Health Report](#)^[1] 2000. It provided a framework and measurement approach to examine and compare aspects of [health systems](#) around the world.^[2] It developed a series of performance indicators to assess the overall level and distribution of [health](#) in the populations, and the responsiveness and financing of [health care](#) services. It was the organization's first ever analysis of the world's health systems.^[3]

Ranking ⇅	Country ⇅	Per Capita Expenditure ⇅
31	 United States	1

What I didn't understand was the burden patients face in managing the health care system: a massive web of doctors, insurers, pharmacies, and other siloed actors that seem intent on not talking with one another. That unenviable task gets left to the patient, the secret glue that holds the system together.

DESIGN THINKING

A FRAMEWORK FOR INNOVATION

UNCERTAINTY / PATTERNS / INSIGHTS

CLARITY / FOCUS

Adapted from Central Office of Design

The five phases of the design process:

1
DISCOVERY

2
INTERPRETATION

3
IDEATION

4
EXPERIMENTATION

5
EVOLUTION

I have a challenge.
How do I approach it?

I learned something.
How do I interpret it?

I see an opportunity.
What do I create?

I have an idea.
How do I build it?

I tried something.
How do I evolve it?

and we fail quickly to succeed sooner

call me: Bill

I want you to know:

- I'm an army doctor
- I have a wife and adult son
- I'm an avid skier

My goals:

- discharge within 1 day
- back to work next week
- full function after recovery

current pain level

call me: Hugh

If I weren't here I would likely be: Exercising at the gym. I enjoy exercise

You should know: I'm a former IRS agent who was the first in his family to go to college.

The most important thing to me is: Helping others. I love to help people however I can.

ROOM 114

PLEASE CALL ME:

WHAT I WOULD LIKE YOU TO KNOW ABOUT ME:

I've got two dogs named Amy + Bamba. I'm a retired methodist minister.

WHAT I VALUE/LOVE MOST:

Getting back to my pups Amy + Bamba

I don't have my hearing aid in.

INNOVATORS

DONT DO THIS

- I.T. will never support it
- legal will never allow it
- well we tried that before...
- it needs more study
- let's form a committee
- we don't have the resources

A group of people in a modern building hallway. A large, semi-transparent blue arrow graphic points from left to right across the center of the image. The text "run towards the challenge" is overlaid in white, sans-serif font, centered within the arrow. The background shows a multi-level atrium with a staircase, glass railings, and people in professional attire. A man in a suit is visible on the right, and a woman in a light-colored blazer is in the center. The overall color palette is muted, with purples and blues.

strategic goals

innovation

end user focus

The most compelling things come from a understanding the needs, hopes, fears and dreams of people who will use whatever it is you're working on. Design Thinking is a rigorous process for driving innovation based on end users.

enablers:

design thinking
focus groups
feedback tools

speed

Innovative teams look more like start-ups than large corporations. Speed means going from inspiration to implementation quickly so innovators don't lose momentum or focus. Speed looks like having access to supplies, tools and resources quickly and easily.

enablers:

purchase cards
wide range of skills
embedded techies

low cost of failure

Smart teams test ideas early, in their most raw states. Fear of failure is the number one inhibitor of testing ideas. Testing doesn't have to mean creating business or legal risk, but it does require the psychological safety of being free from judgment or repercussions.

enablers:

leadership support
leadership modeling

authority

Teams working on new solutions need a wide scope to access tools, spaces, problems and resources. They need to build on speed and a low cost of failure by making quick decisions and effecting things in short time. One way is to build parallel structures.

enablers:

innovation wifi
network
dedicated staff

continuous learning

New ideas come from a broad exposure to new thoughts, different industries and ways of thinking. Innovation teams need to seek out and cultivate learning opportunities. These can come from inside the team by sharing skills or from outside sources.

enablers:

lunch-n-learns
field trips
conferences

be wild!

Play is a serious part of innovation. Teams should make space for things like improv, stokes, and tossing balls around. The awesomest innovation teams whimsically flow between play and serious work. Playful teams also find creative solutions faster.

enablers:

lunch-n-learns
field trips
conferences
